PRESS RELEASE

## **PST Enhances Resource Allocation and Reporting Features in ManagePro**

*New advancements in award-winning management software improve resource allocation planning and tracking*

**Smith River, CA, October 28, 2010** – Performance Solutions Technology, LLC ([www.managepro.com](http://www.managepro.com)), developer of award-winning software that propels goals and plans into results, announced the latest release of the company's flagship product, ManagePro ®. The new release provides added focus, alignment and performance management.

Top rated ManagePro combines project management and performance management features in a single collaborative solution for an entire organization or for the individual. ManagePro assists organizational leaders in responding to today's business realities, by leveraging information to ensure visibility, focus and follow-through across all of their job functions. From strategic goals, to project and task management, to individual performance—ManagePro ties everything together. Their Outlook Add-in feature not only synchronizes to-do's and calendar events, it also lets users drag and drop email directly into ManagePro as to-do's, progress updates, or events.

Key among the new features include:

- **Improved Planning** around Resource Allocation: A re-write of the entire function now makes the allocated hour figure primary, not the % of time a person is allocated to a task.
- **Immediate Focus on who's leading, who's accountable, and who's available** for any given task or project regardless of how many people are involved.
- **Better Reporting** features for previews and outputs to .PDF, Excel and RTF now support the pc language formatted currency for all numeric based fields including calculated fields

"Our clients embrace the software because it is easy to use and very little training is needed to become proficient, said Bryan Smith, Vice President of Stone Business Professionals, Inc. " The amount of time spent in the traditional meeting has been reduced 40-60%! Not only is less time spent in meeting but they are now proactive planning sessions and since everyone knows where they stand before they enter the meeting no one meets to "get an update.""

"Like the businesses in which it's been put to use, ManagePro continues to get better all the time," said Rodney Brim, Ph.D, CEO of Performance Solutions Technology. "We listen to customers needs, and we use the software to run our entire business—we're always seeking ways to make the software better for our customers *and* ourselves.

ManagePro 9.5 is available now for download from [www.managepro.com](http://www.managepro.com) and comes in both the desktop version and a web-based version (MProLite). Pricing starts at \$255 for web-based MProLite and \$525 for Standard and Smart editions, and \$1045 for the Plus edition. Licensing includes one year of free upgrades, after which maintenance contracts are available. ManagePro runs on Windows XP, Vista, Windows 7, and Mac operating systems.
